- To significantly improve the freedom of cryptocurrency, in underdeveloped and developed countries.

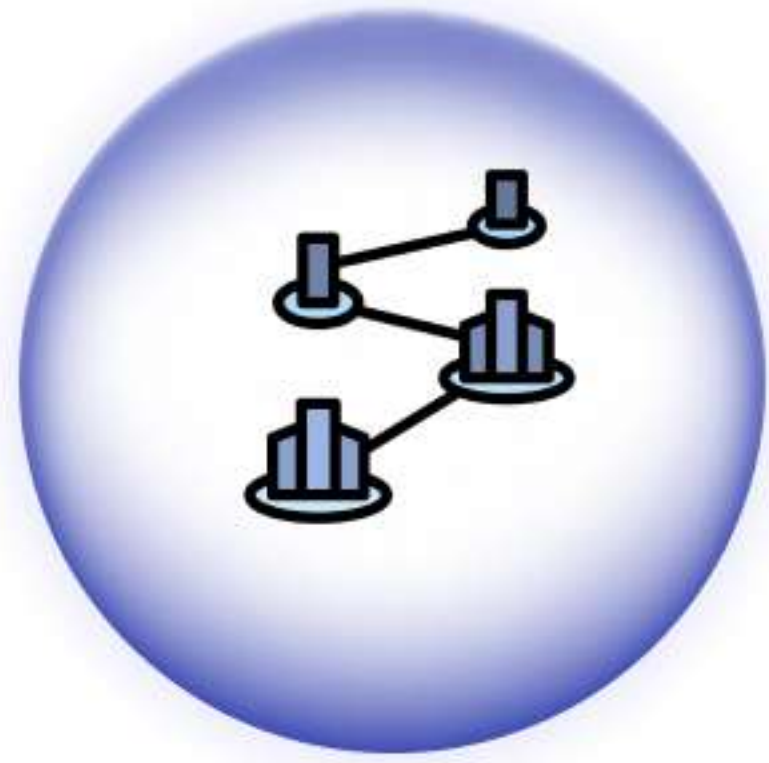

Our Vision

We're building the future of finance. To inspire and revolutionize through innovation in accessible portal between the blockchain investments and traditional investments and also complaint blockchain technology.

The Problem

Scalability

Complicated UX

Privacy
&
Security

Lack of Actual
Utility Backed
Products

Fraud & Scam

The Solution

- **Reduced Fraud and Blockchain Implementation**
Creating a traceable, transparent platform while ensuring the safety of users assets and portfolio.
- **Minimal Operation and Transaction Costs**
Transaction costs are reduced much lower than custom at a speedily operation.
- **Blockchain Awareness with Intuitive UI**
Combating the gap, creating increased awareness of how blockchain can be used and its overall impact on society by designing a user friendly platform which is twice as effective.

The Future of Cryptocurrency

**Digital
Ownership**

**Cashless
Community**

**Virtual
Wallets**

Competitive Advantage

In an increasingly competitive decentralized finance market, the need for uniqueness and innovation is critical. Dyleum offers a range of utilities backed by real-world utilities, such as NFT, farming, and NFC payment. This sets it apart from other protocols in the space, which do not offer anything close to the same level of uniqueness and sustainability. Dyleum is committed to making cryptocurrency a way of life, just like exchanging fiat currency. This positions it as a leader in the decentralized finance market.

SWOT Analysis

STRENGTHS

- Tokenization of Real assets
- Innovative Mindset
- Best Transaction rate
- Strong brand image & Equity
- NFC payment

WEAKNESSES

- Product Insurance cost are rising
- High level of Third-Party turnover due to competitors
- Long term Investors

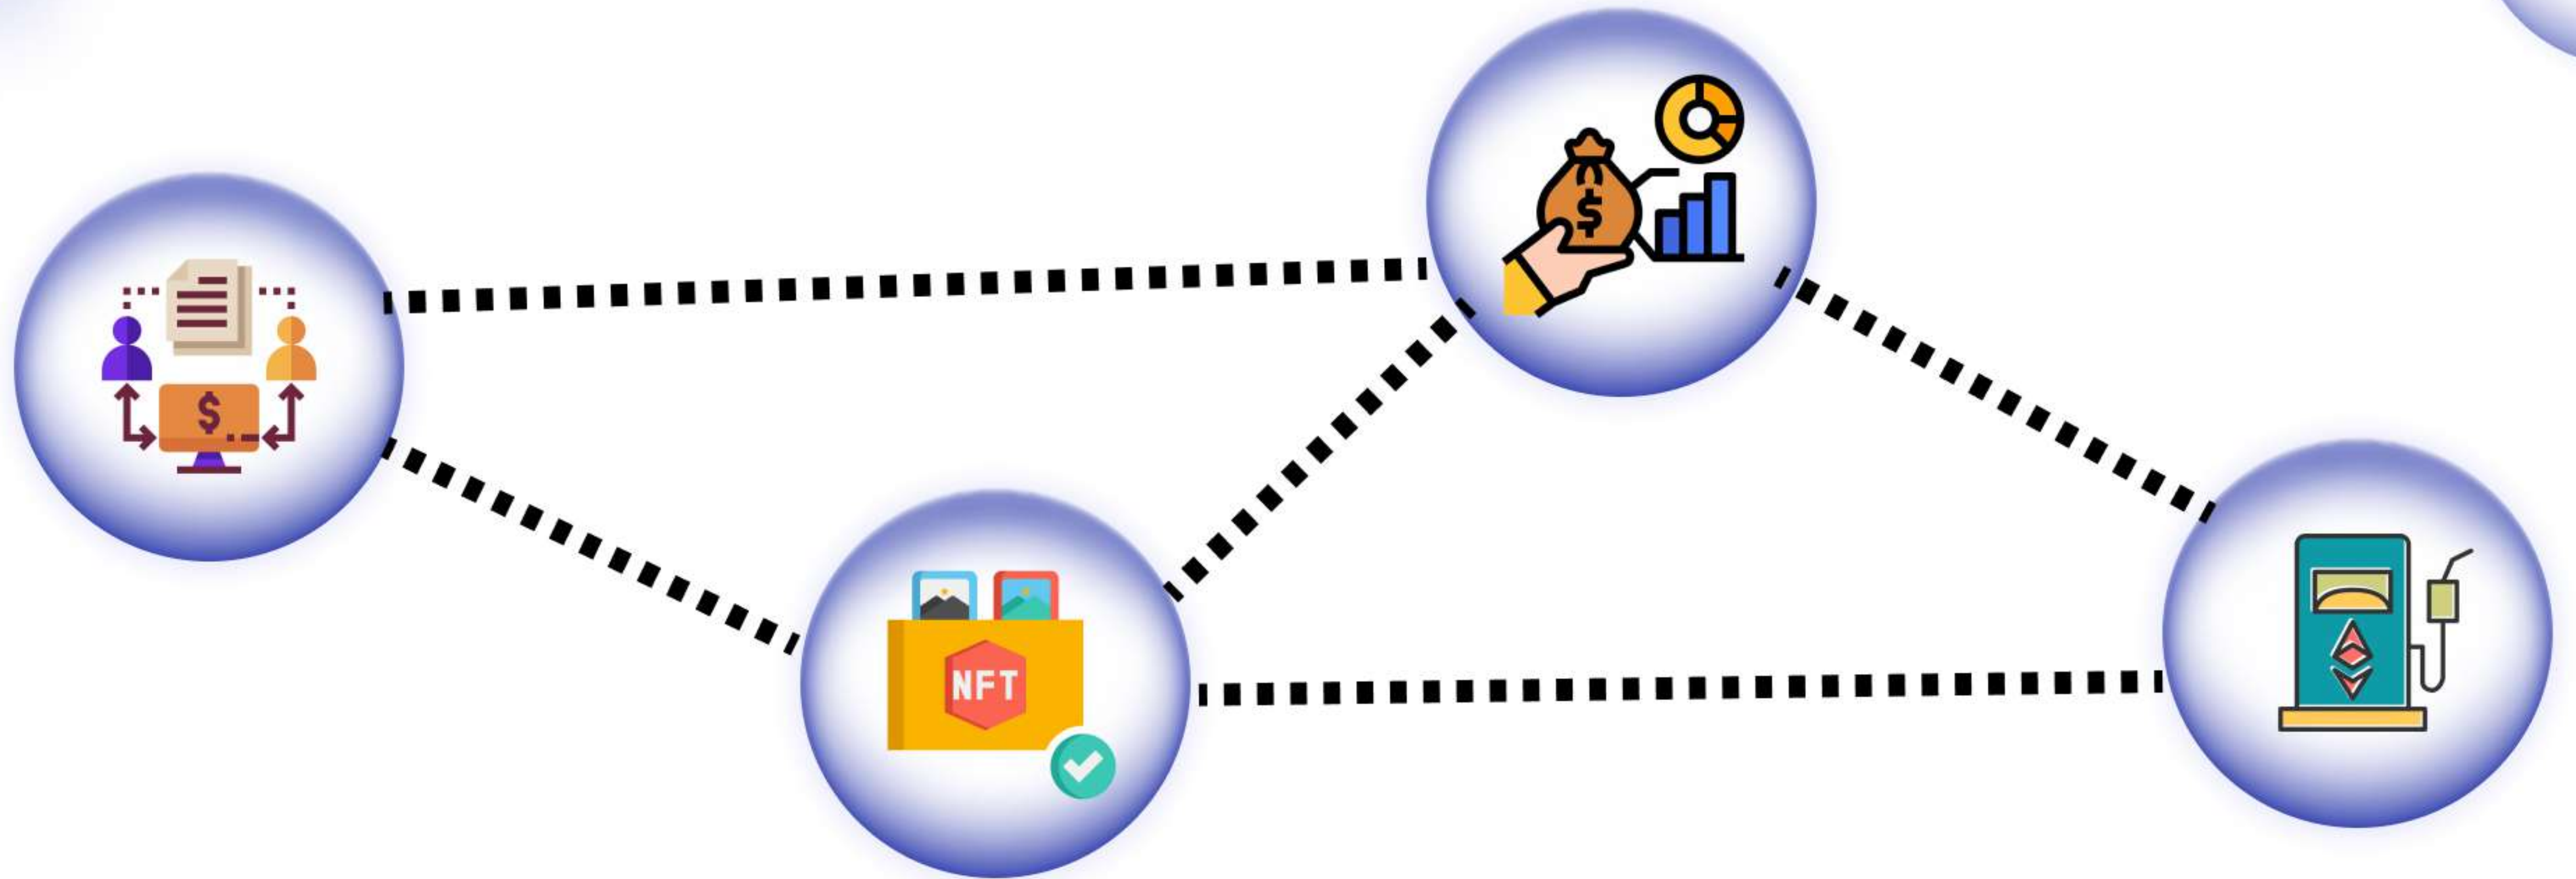

OPPORTUNITY

- New market target
- DeFi's infrastructure improvement

THREATS

- New Competitors from other country
- High level of Employee turnover

Revenue Model

Transaction fees will be charged by Dyleum during transactions such as swapping, minting real estate NFT, and investment pool pledge and claim. Fees collected will be used to develop, market, and reserve liquidity for the ecosystem. All fees are clearly stated in the Whitepaper and are budgeted for various aspects.
